

HOME ABOUT CONTACT US

Accurate and timely patient information – from EMS to hospital – for improved readiness and continuity of care.

INTEGRATIVE PREPAREDNESS

Accurate and timely patient information and trauma service preparation are valuable assets in providing optimal patient care and improving recovery rates. Hospitals use Web-based Hospital Hub™ to access the ePCR from ambulance services in PDF format for patients as they arrive. Hospital Hub connects with EMS providers at local, statewide or even multi-state level using Service Bridge™, Rescue Bridge™ or State Bridge™.

- A complete ePCR is available for each patient's medical record
- Provides advance notice to prepare space and treatment
- Filters to show relevant only records

There are two ways to add or view outcome data.

1. Through the action bar on the right side of Hospital Hub.

Male	05/04/1975	Weakness (General)		Ross Valley Paramedic Authority ...			 Print View Attach Outcome Related Log
Female	12/04/1938	Traumatic Injury	Fall - Ground Level	CMFD			
Male	07/03/1981	Altered Level of Consciousness		Marin County Fire Department			
Male	08/22/1935	Altered Level of Consciousness		San Rafael Fire Department			
Female	09/15/1929	Weakness (General)		San Rafael Fire Department			
Female	05/15/1942	Altered Level of Consciousness		Southern Marin Emergency Medical...			
Male	02/21/1955	Chest Pain - Suspected Cardiac		CMFD			

2. Through the outcome icon in the Outcome column.

The Outcome column icon allows you to quickly enter outcome data.

The green circle on the Outcome column icon displays the number of times data was updated and submitted for the patient.

From the Hospital Hub list, select an incident or click the outcome icon in the Outcome column, if available.

Enter the outcome data as needed.
