

Cardiac Arrest Treated in Marin County
January – December 2015
All Agencies

Bystander CPR

Bystander CPR is CPR performed by a person who is not responding as part of an organized emergency response system approach to a cardiac arrest. Physicians, nurses, and paramedics may be described as performing bystander CPR if they are not part of the emergency response system involved in the victim's resuscitation.

46% of all cardiac arrest patients received bystander CPR
50% of VF/VT patients received bystander CPR
