**Indications**

- To define procedures indicated by ALS RMC per treatment guidelines
- Patient condition warrants ALS care/assessment, but does not meet the indication of any other treatment policy

**Monitoring as indicated:**
- Cardiac
- Core temperature
- ETCO2
- 12-Lead EKG
- Blood glucose

**Airway interventions as indicated:**
- Initiate oxygen therapy for respiratory distress, signs of hypoxia, suspected CO poisoning, or SpO2 <94%
- Advanced airway management

**Circulatory interventions as indicated:**
- Intravascular access
- Intraosseous access

**Pediatric Patient**
- Use length based color-coded resuscitation tape and apply corresponding wrist band

**CRITICAL INFORMATION**

- Best practice is to maintain cardiac/ETCO2 monitoring all the way through transfer of care
- Continuous monitoring is required for any patient who has been administered a sedative or analgesic during EMS evaluation/transport
